

## Belt Tying 101

1. Left side of the jacket lays over the right side (does not matter if man or woman ) approx. 30 cms of the belt lays to the left. Wrap the rest around the body.

2. Wrap a second time around the body. Now you should be left with the same size piece of the belt to the right.

3. Wrap second end piece from the bottom behind everything to the top.

4. Now wrap the first end piece through the center pieces from the top so that it creates a funnel.

5. Pull the right piece from the top through the funnel.

6. Pull both sides flat so that it will create an origami hexagon.
